## ARTWORK & APPROVALS

**Digital File Formats:** Artwork should be submitted in two methods. The first and most important is a vector format. Traditionally, file extensions for vector art end in .EPS, .CDR, .AI or in some cases .PDF.

The second file submitted should be a .jpg. This will allow us to ensure that there have not been any colour changes or alterations to your vector artwork which can sometimes occur due to new graphic software. Please limit file sizes to 30 MB.

With some decoration options, high-resolution .jpg formats are acceptable but not recommended. Avoid using images from the internet, as most do not print with an acceptable level of quality.

**Saving Your Artwork:** When designing your art files, please ensure that all Corel files must be saved in Corel X4 or lower. While using Adobe Illustrator, files must be saved in CC or lower. In all instances, ensure that you have converted all fonts to outlines (for Adobe users) or curves (for Corel users) before submitting artwork. If you are unable to provide proper vector artwork we can redraw your logo at a rate of \$39.00 per ½hour

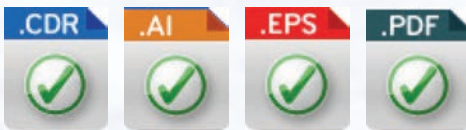

**Understanding Colour:** When embellishing using heat transfers, tackle twill or appliqué; referencing PANTONE® colours or CMYK values is required. Full colour heat transfers are printed using a 4-colour process inks, known as CMYK (Cyan-Magenta-Yellow-Black). Note that exact colour matches are not always obtainable using CMYK inks.

**Art Proofs:** Unless stated on your proof, all artwork will be to size. Ensure that when printing your art proofs, "fit to page" is not selected. Once an electronic approval is received indicating that your proof is correct, production will commence. All orders will be non-refundable.

**Trademarks and Copyrights:** Purchasing professional, college, and corporate custom designs for the purpose of profiting from the identity of those designs requires a license. The unauthorized use of registered trademarks and copyrighted logos or designs is illegal. When manufacturing products which incorporate these logos, we assume that you have obtained permission. We do, however, reserve the right to ask for written confirmation of this permission. NRG Active Apparel Inc. accepts no liability for any unauthorized use of such material. NRG Active Apparel Inc. reserves the right to refuse to cut and/or design a dealer's order or parts of an order which are deemed to be offensive or which may allegedly be in violation of any legal statute.

**Dye Migration Caution:** Certain color and design restrictions may apply on applications due to sublimated fabric. For best results, we always recommend consulting with our decoration department. Some Heat Transfer Solutions are not guaranteed to block dye migration. Due to the variability of textiles available on the market testing is highly recommended. If you are applying your transfers to polyester garments, it is advised that you do not pre-heat the garment. NRG Active Apparel Inc. will not be held responsible for damaged garments due to dye migration.

### VECTOR FORMATS

### NON-VECTOR FORMATS

Should vector artwork not be readily available, we also accept the following formats. Please be aware that additional art fees may apply.

**Abandoned Merchandise:** All merchandise ordered or drop shipped is used for immediate order fulfillment.
